

## **AFS Desktop Software Training**

Winter 2011/2012

Dear AFS Customer,

We would like to thank you for using AFS Desktop Software! Following your requests, we are proud to announce AFS Desktop Software Training in your area.

### **Desktop Training (9 am to 3 pm)**

#### **The morning of this session will be very basic covering:**

Basic tools, reading files from yield monitors and planter monitors, editing/saving legends, moving fields, creating and printing maps, printing charts, and printing reports

#### **The afternoon of this session will cover:**

Downloading satellite imagery, creating boundaries, creating soil sampling regions, reading soil lab data, creating prescriptions, exporting data to a monitor, and creating backups

**\*\*Each person must be at an intermediate level of computer knowledge. Basic Microsoft Windows operation is a requirement, as this training session will not cover basic Microsoft Windows commands.**

Each person who registers for a workstation may bring a second person to share that station. That second person will be charged half the registration price.
